JAVA ASSIGNMENT

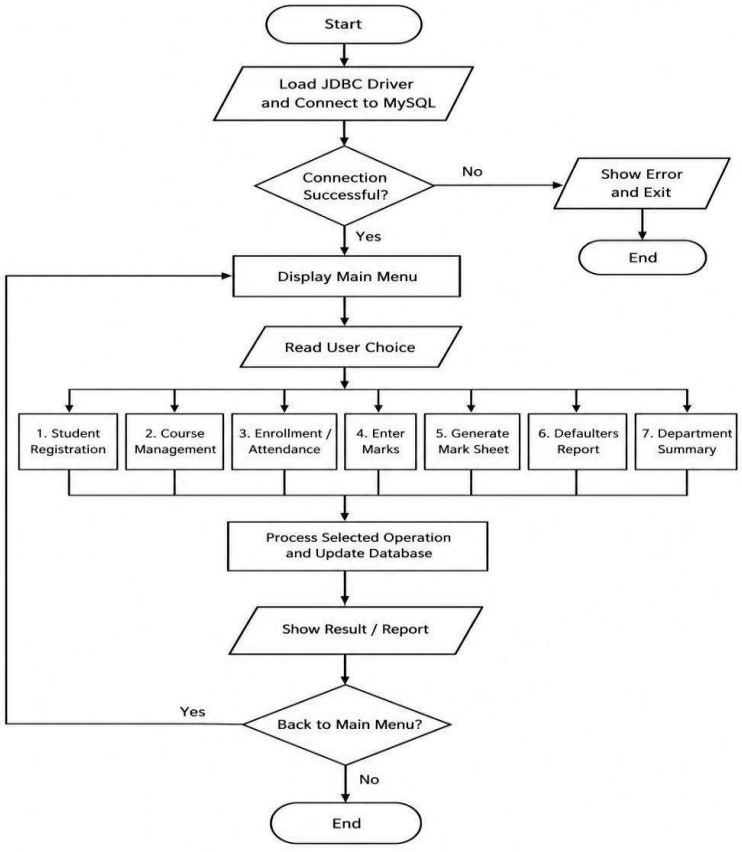

AIM:

Development of Kongu Engineering College (R2024) Student Academic & Continuous Evaluation System using Java JDBC.

OBJECTIVE:

Design and develop a database-driven Java application using JDBC to manage student records, perform incremental marks entry (Continuous Internal Assessments and End Semester Examinations), enforce attendance eligibility rules, and generate formal academic performance reports according to Kongu Engineering College (Autonomous) - Regulation 2024. System Requirements & Specifications.

FLOW CHART:

PROCEDURE:

- Load the MySQL Connector Java driver to establish seamless communication between the Java application and the database.

- Establish a connection to the local MySQL database using the correct login details.

- Add and manage student information, including roll number, name, department, and semester, along with course details such as code, name, credits, and category.

- Register students for courses and record their attendance by maintaining the number of classes held and attended.

- Decide exam eligibility based on attendance percentage. Students with 75% or above can attend exams, those with 65% to 74% need medical condonation, and those below 65% are marked as attendance defaulters.

- Enter and maintain internal assessment marks for tests, assignments, quizzes, and practical work.

- Record end-semester exam marks and identify absent students. Ensure that students meet the minimum passing marks for each course type.

- Calculate total marks using internal and external scores, assign grades and grade points, and identify students who need to reappear for exams.

- Prepare semester mark sheets with internal marks, external marks, total marks, and GPA. Also, generate attendance defaulter lists and show the pass percentage for each department through the console menu

DATABASE SCHEMA:

1.STUDENTS TABLE:

```
mysql> describe students;
+------------------+-------------+------+-----+-------------------+-------------------+
| Field            | Type        | Null | Key | Default           | Extra             |
+------------------+-------------+------+-----+-------------------+-------------------+
| roll_no          | varchar(20) | NO   | PRI | NULL              |                   |
| name             | varchar(100)| NO   |     | NULL              |                   |
| department       | varchar(20) | NO   |     | NULL              |                   |
| current_semester | int         | NO   |     | 3                 |                   |

RESULT:

Thus, the Student Academic and Continuous Evaluation System for Kongu Engineering College (Autonomous) Regulation 2024 was successfully designed, developed, and tested using Java (JDBC) and MySQL. The system accurately automates the calculation of Continuous Internal Assessments (CIA), End Semester Examinations (ESE), Letter Grades, Attendance Eligibility, and Semester Grade Point Average (SGPA).
